* Results not typical. Weight loss, muscle gain, lifestyle, and other results depicted in this publication reflect exceptional experiences of Isagenix customers and should not be construed as typical or average. Results vary with individual effort, body composition, eating patterns, time, and other factors, such as genetic and physiological makeup. In a study performed in 2012 by University of Illinois at Chicago researchers, subjects lost an average of 9 pounds after 30 days on an Isagenix System. The subjects also had a greater level of adherence and had more consistent weight loss from week to week compared to subjects on a traditional diet.

THE ISAGENIX SYSTEM WORKS.

Our no-compromise approach to product innovation and our convenient solution systems are what make us unique.

Isagenix products are scientifically designed and bundled to work together to help you reach your goals. Isagenix product paks and systems are conveniently packaged to help you take the guesswork out of achieving your best results.

Hundreds of thousands of people across the world have experienced weight loss, weight maintenance, muscle building and retention, and an improved fitness performance by using Isagenix products.

Our commitment to scientific research in nutrition and health is one of the factors that sets us apart. By partnering with established universities and laboratories conducting clinical studies, Isagenix is contributing to evidence-based nutrition research while also providing clinical substantiation for Isagenix Systems for healthy weight loss and healthy living.

In 2011, the Isagenix System was first validated by the University of Illinois at Chicago (UIC), a leading research institution in the field of health sciences. Their research showed the Isagenix System had superior results and is scientifically proven to work.*

Further testing, research, and field insight at Isagenix has continued to inspire us to produce products that are safe for everyone all over the world, and athletes are no exception. For this reason, we are proud that Isagenix performance products are now Informed-Sport certified. This voluntary certification program, conducted by a third-party company, regularly tests sports nutrition products for banned substances and confirms that they've been manufactured under high-quality standards.

Informed-Sport certification for Isagenix sports nutrition products is yet one more example of our commitment to no-compromise quality.

With Isagenix, subjects saw an average of:

Pictured: 30-Day Cleansing and Fat Burning System

*After a 10-week study, subjects on the Isagenix System had superior results compared to a heart-healthy group. The UIC study was a major milestone for Isagenix, and its findings were reported in two reputable peer-reviewed journals in 2012 – Nutrition Journal and Nutrition & Metabolism. Complete Essentials With IsaGenesis

A Foundational Product for Longevity

†Autoship Rewards pricing.

WHAT IS COMPLETE ESSENTIALS WITH ISAGENESIS?

Complete Essentials With IsaGenesis is a foundational product for your best health and longevity. IsaGenesis adds greater cellular and telomere support, plus a full spectrum of vitamins, minerals, omega-3s, and antioxidants for superior healthy aging and whole-body nutritional support.†

WHY DO I NEED COMPLETE ESSENTIALS WITH ISAGENESIS?

It's difficult to get the vitamins and nutrients you need from food alone, and it gets increasingly difficult as you age. Complete Essentials With IsaGenesis delivers optimal levels of nutrients for superior whole-body nutritional support at every age.†

HOW DOES IT WORK?

Complete Essentials With IsaGenesis is scientifically formulated to deliver the daily nutrients men and women need for overall health, and is separated into two packs – A.M. and P.M. – for effective dosing.†

IsaGenesis

- WHAT** A supplement designed to deliver telomere and antioxidant support.[†]
- WHY** Our DNA is protected by *telomeres*. As we age, our telomeres can shorten faster than they should if we don't take steps to protect them. Factors such as oxidative stress, an unhealthy diet, and lifestyle choices can contribute to the acceleration of telomere shortening, which can lead to more rapid aging.
- HOW** IsaGenesis supports youthful cell function and healthy telomeres, and helps neutralize free radicals that can accelerate the aging process.[†]

IsaOmega™

- WHAT** Pure omega-3 essential fatty acids to support heart, brain, and joint health.[†]
- WHY** Our formula combines one of the most concentrated sources of DHA and EPA omega-3 essential fatty acids available. These fatty acids have been found to support cell function and heart, brain, and joint health.[†]
- HOW** The fish oil is sourced from sustainable suppliers and goes through a molecular distilling process that creates a highly concentrated and pure oil.

CytoActives™

- WHAT** Vitamin D, coenzyme Q10 (CoQ10), tocotrienols, and resveratrol to support youthful energy, cell function, and overall health.[†]
- WHY** Over time, we gradually lose our ability to fully synthesize some nutrients that help restore our body's vital systems.
- HOW** CytoActives works to protect your body by using the latest bioactive ingredients to help support healthy aging and maintain physiological reserves and functions.[†]
